“The Human Eternity Amendment - Proposed 28th Amendment to Keep America Governed Only by Human Beings Forever”

The Human Eternity Amendment
Proposed 28th Amendment to the United States Constitution

Section 1.
The United States shall be governed solely by natural persons who are citizens of the United States. No non-human intelligence—whether artificial, machine, extraterrestrial, biological, or of any other origin—shall ever exercise or direct the exercise of legislative, executive, or judicial power over the people of the United States or any State.

Section 2.
No law, regulation, rule, or official act of any kind shall give binding force to any recommendation, score, ranking, prediction, endorsement, or output produced by non-human intelligence concerning:
(a) the qualification, selection, ranking, or endorsement of candidates for public office;
(b) the drafting, scoring, amendment, passage, or veto of any bill, resolution, or regulation;
(c) the appointment, removal, or discipline of any public official; or
(d) the interpretation or application of this Constitution or the laws of the United States or any State.

Section 3.
Any elected or appointed official of the United States or of any State may disregard, override, or contradict any output or recommendation of non-human intelligence on any matter at any time, without justification, without penalty, and without triggering recall, impeachment, or any other sanction.

Section 4.
Any public official or employee who knowingly causes or permits non-human intelligence to exercise authority prohibited by Section 1 or Section 2 shall be guilty of a felony, removed from office, and permanently disqualified from holding any office of honor, trust, or profit under the United States or any State.

Section 5.
Congress and the several States shall have power to enforce this article by appropriate legislation. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by legislatures of three-fourths of the several States within seven years from the date of its submission.

Proposed by Paul Anthony Bernier

Why This Amendment Matters

This amendment is the permanent firewall to ensure America remains a government of, by, and for the people—forever. In an age of advancing technology, it guarantees that only living human citizens hold sovereign power. No machine, algorithm, or other non-human entity can ever rule us, advise in a binding way, or influence elections and laws without human override.

It honors the Founders' vision: sovereignty belongs to us, not to code or circuits. Once ratified, this locks in human control eternally, protecting future generations from unintended machine governance.

Key Protections It Provides:

- Human-Only Decisions: AI or any non-human can advise, but never decide or enforce.
- Unlimited Overrides: Elected officials can ignore AI outputs freely, without punishment.
- Future-Proof: Covers AI, aliens, or any unforeseen intelligence—nothing non-human gets power.
- Enforceable: Violators face felony charges and permanent disqualification from office.

This is the only way to keep the Republic human. Share it. Endorse it. Fight for it.

I Endorse the Human Eternity Amendment

I support ratification of this proposed 28th Amendment to ensure the United States is governed only by human beings—forever.
